PROFILE SUMMARY

MERN Stack Developer with 2+ years of hands-on experience building and deploying web applications with React.js, Node.js, Express.js and MongoDB. Experienced in designing RESTful APIs, implementing JWT-based authentication, integrating third-party APIs, and deploying applications across AWS, Vercel and Netlify. Strong focus on performance, maintainable code, debugging, automation and reliable production systems

EDUCATION

BS Information Technology

2021-2025

University of Gujrat

RELEVANT COURSEWORK

- Web Development (HTML5, CSS3, JavaScript)
- Frontend Development with React.js
- Backend Development with Node.js & Express.js
- Database Management Systems (SQL, MongoDB, NoSQL)
- Object-Oriented Programming (C++)
- RESTful API Design & Integration
- Software Engineering Principles
- Data Structures & Algorithms (Basics)
- Cloud Computing & Web Deployment

PROFESSIONAL EXPERIENCE

Codewave Technologies (8 months)

(Nov, 2024 – Jun, 2025)

- Built and deployed full-stack web apps using MERN stack, improving load times by 25%.
- Designed and integrated RESTful APIs for seamless frontend-backend communication.
- Collaborated in Git-based workflows to enhance code maintainability and teamwork.

Koncept Solutions Internationals (14 months)

(Jul, 2025 – Present)

- Developed business dashboards using React and Express, reducing manual reporting by 40%.
- Implemented secure user authentication with JWT and Firebase.
- Deployed apps on AWS, Vercel and Netlify, ensuring 99% uptime.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Third-party API Integration

Database: MongoDB, PostgreSQL, MySQL, SUPABASE

Dev Tools: Git, GitHub, AWS, Vercel, Railway, Netlify, Cpanel, Docker

APIs: Stripe, Google Maps, Firebase, Cloudinary, OpenWeather, NewsAPI

AI Tools: ChatGPT, DeepSeek, Perplexity, GitHub Copilot

DevOps & Hosting: Linux VPS Administration, Nginx / Apache, SSL/TLS & DNS, Hardening, CI/CD Pipelines, Monitoring & Logging, Backup & Recovery, High Availability, Web Hosting Management

PROJECT EXPERIENCE

Automation Platform | n8n, VPS

- Developed automation workflows and chatbot systems for client operations..
- Implemented monitoring, deployment, and system optimization for reliability.

Epic Journey Rentals | MongoDB, Express.js, React.js, Node.js, Cloudinary

- It is an mesh system where everyone can be registered as an renter or owner and can get or provide items.
- Built a full-stack rental platform using MongoDB, Express.js, React.js, Node.js.
- Designed responsive UI with Tailwind CSS for seamless user experience across devices.
- Implemented JWT authentication and role-based access control for users.
- Link: <https://epic-journey-rentals.vercel.app/>

Spareparts360 | React, Laravel , SQL

- Complete business ERP solution with sales, purchase, inventory management, financial statements, and reporting.
- **Link:** <https://k-tech.store/sparepart360> **Demo:faizan@gmail.com / 12345.**

Infinity Medical | React, Express , Supabase

- Medical Imaging Equipment Provider platform with admin access. End-to-end support for the purchase and services of Medical Imaging Equipment Parts with comprehensive management dashboard.
- Link: <https://infinitymedical.co>

Sanitary POS | React, Laravel , SQL

- Complete business ERP solution with sales, purchase, inventory management, financial statements, and reporting. Features role-based access, item management, stock tracking, and comprehensive accounting modules.
- Link: <https://gnsanitary.org/Koncept-Sanatry-POS>

Enterprise VPS Hosting Platform | VPS, Nginx, SSL/TLS, Backup Systems

- Architected and deployed a production-grade VPS hosting infrastructure for provisioning and reselling web hosting to clients. Includes isolated tenant environments, automated SSL/DNS management, resource monitoring, backup automation, and failover-ready server configuration—engineered for 99.999% availability across managed production servers.
